## Installation diagram:

Clean the installation surface

Measure the length you need to install, cut at the nearest scissor mark line.

For the left led strip, weld at the next scissor mark to connect with other connection wire.

Tear off the double-sided adhesive tape on the back and paste it in a suitable position

Connect the light strip wire to the driver output port (positive pole to positive pole, negative pole to negative pole)

Turn on the power switch after confirming that the line is connected

## Statements :
